ANALYTICAL LENS

Where retail momentum is building

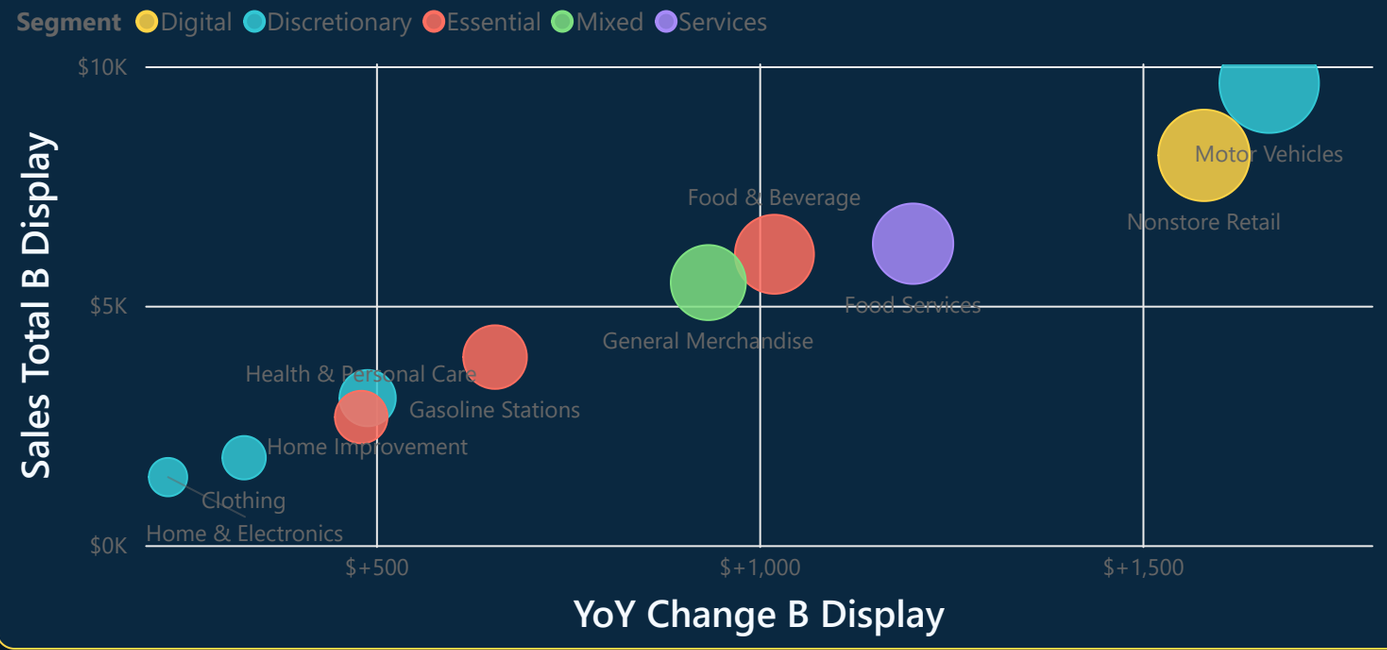

Each bubble is a category-year. Position compares year-over-year change with prior-year scale; bubble size shows current sales.

SEGMENT: All

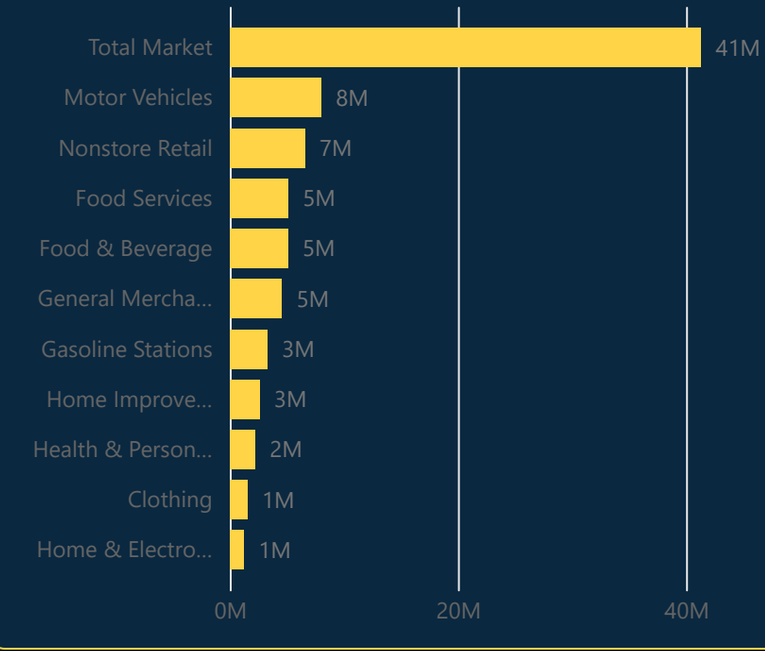

YEAR: All

YOY GROWTH	DISTANCE TO PEAK	YOY CHANGE	FILTERED SALES
21.5%	100.0%	17.4M	98.7M

U.S. CENSUS DATA

2020–May 2026

TRANSPARENCY BY DESIGN

Methodology & Sources

A trusted analytical product should be as rigorous as it is beautiful.

WHAT THIS DASHBOARD ANSWERS

Which categories account for the largest share of retail activity?
How has monthly sales momentum changed since 2020?
Which categories are gaining or losing ground year over year?
How do essential, discretionary, digital, and service segments compare?

DATA FOUNDATION

Source: U.S. Census Bureau Monthly Retail Trade Survey
Grain: business category × month
Coverage: 11 categories, Jan 2020–May 2026
Rows: 847 category-month observations
Unit: millions of current U.S. dollars

METRIC DEFINITIONS

Total Sales: seasonally adjusted monthly retail and food-services sales.
Prior Year Sales: comparable category sales twelve months earlier.
YoY Change: current sales minus prior-year sales.
Share of Selected Sales: category sales divided by the filtered market total.

INTERPRETATION GUARDRAILS

Recent Census estimates may be preliminary and are revised as new information becomes available.
Figures are seasonally adjusted for calendar effects but are not adjusted for inflation.
The selected categories are analytical views of the published national series; this dashboard is descriptive and does not infer causality.
